WORK EXPERIENCE

Software Engineer – DevOps (Client: Ericsson)

Tata Consultancy Services (TCS)

📅 Oct 2024 – Present 📍 Hyderabad, India

- Built deployment pipelines for microservices using Docker and Kubernetes, supporting backend services in production
- Automated build and deployment workflows, improving system reliability and reducing manual intervention.
- Collaborated with cross-functional teams to ensure smooth integration and scalability of backend services.

Full Stack NLP Engineer Intern

Solomons International

📅 September 2023 – February 2024 📍 Tenali, India

- Developed docNLP, an AI-powered platform using MERN and OpenAI APIs for NLP learning and experimentation.
- Built and integrated NLP features including summarization, classification, topic modeling, keyphrase extraction, and NER.
- Implemented RBAC with protected routing and added interactive features like a chatbot, code editor, and compiler.

PROJECTS

TalenTrail

Live Demo: final-year-project-client-five.vercel.app

- Built a full-stack recruitment platform using MERN + Flask, enabling end-to-end student–recruiter workflows
- Designed and developed REST APIs for resume parsing, job matching, and candidate scoring using OpenAI APIs
- Implemented authentication & RBAC, ensuring secure access control across multiple user roles

FoodChat

GitHub Link: github.com/saisriharsha2003/WhatsAppFoodBot

- Developed a WhatsApp-based chatbot system using Python, Flask and Twilio for automated order processing
- Built backend logic for real-time menu retrieval, order handling, and user interaction workflows
- Designed conversational flows improving user engagement and automation efficiency

VoiceOps Assistant

GitHub Link: github.com/saisriharsha2003/VoiceOpsAssistant

- Developed a voice-controlled assistant using Python with speech recognition and ML-based intent classification.
- Implemented automation for tasks such as email handling, messaging, and web navigation.
- Designed a modular intent-routing system to enable scalable addition of new commands and features.

EDUCATION

Bachelor of Technology (B.Tech)

Major: Computer Science and Engineering (AI & ML)

Vasireddy Venkatadri Institute of Technology

📅 July 2020 – June 2024 CGPA: 8.45

Intermediate (MPC)

Narayana Junior College

📅 June 2018 – March 2020 CGPA: 9.7

SKILLS

Frontend: React.js, HTML, CSS, Tailwind, Bootstrap

Backend: Node.js, Express.js, Flask

Databases: MySQL, MongoDB

Programming: Python, Java, JavaScript

AI / NLP: Natural Language Processing, Artificial Intelligence, OpenAI APIs

Cloud & DevOps: Linux, Docker, Kubernetes, Jenkins, Ansible, Helm, Groovy, AWS

Tools: Git, GitHub, Postman, Bitbucket, VS Code, PyCharm, IntelliJ IDEA, Apache Tomcat

ACHIEVEMENTS

- Recognized as one of the top 6 performers during ILP training at TCS.
- Solved 500+ DSA problems on LeetCode, with strong proficiency in data structures and algorithms

CODING PROFILES

- Leetcode:** leetcode.com/saisriharsha2005
- HackerRank:** hackerrank.com/profile/rankelassh

CERTIFICATIONS

- Programming Data Structures and Algorithms using Python - NPTEL
- The Complete Python Bootcamp From Zero to Hero in Python - Udemy
- Java Full Stack - Wipro TalentNext
- HTML, CSS in depth from Coursera (Meta)
- The Complete 2023 Web Development Bootcamp - Udemy
- AWS Cloud Foundations
